

Front-End Web Development

---

# Homework 1

# Homework Assignment

## In this homework you will:

- Reinforce basic HTML/CSS skills you've recently learned.
- Use Chrome's Developer Tools.
- Expand your HTML and CSS horizons with new tags and properties.

# Assignment: Make a GA Press Release

Your first assignment in this class is to make a **press release for General Assembly**, like the one pictured here.

We will give you content and colors, but how it looks is ultimately up to you.

## General Assembly Offers Classes and Workshops Worldwide

**For Immediate Release**

General Assembly, which started in New York as a startup incubator, now offers classes and workshops in technology, design, and entrepreneurship, with campuses around the world in:

Atlanta	Austin	Boston	Chicago	Hong Kong
London	Los Angeles	Melbourne	New York City	San
Francisco	Seattle	Singapore	Sydney	Washington D.C

For more information, visit [General Assembly's Website](#) or our [About](#) page

# Explore Some Successful GA Press Releases

All of these were made by students just like you!

- Solution 1: <https://codepen.io/GAmarketing/pen/yLyLjwq>
- Solution 2: <https://codepen.io/GAmarketing/pen/eYmYrob>
- Solution 3: <https://codepen.io/GAmarketing/pen/yLyLqGg>
- Solution 4: <https://codepen.io/GAmarketing/pen/mdydjaY>
- Solution 5: <https://codepen.io/GAmarketing/pen/eYmYjxE>

Bonus: Solution 6!

# As You Explore... Learn Chrome DevTools

It's the main tool we'll use in class to examine the HTML/CSS of our own projects as well as the websites we all know and love. It will also be the tool we use to make subtle changes to apply and test CSS.

Watch the following video to get more familiar with Chrome's Developer Tools:

- [Google Chrome's Developer Tools for Beginners](#)

Then, read the following article to learn how to manipulate a page:

- [Inspect and Edit Pages and Styles](#)

# Remain Calm!

It's your first real assignment, which can be nerve-racking. Take a deep breath!

Use the tools we've shown you and, more than anything, explore HTML and CSS. There isn't a wrong answer to this assignment, so just do as much as you can.
